SUMMARY

Aspiring AI & ML engineer with hands-on experience in Python, Machine Learning, data processing, and software development. Strong foundation in Object-Oriented Programming, Data Structures and Algorithms, SQL, and REST APIs. Experienced with Pandas, NumPy, Scikit-learn, Django, OpenCV, and TensorFlow Lite. Strong problem-solving and analytical skills with a keen interest in AI-driven automation and computational science.

SKILLS

Programming Languages: Python, Java, C, SQL
Technical Skills: OOP, Data Structures & Algorithms, SDLC
Developer Tools: Git, GitHub, VS Code, Power BI, Tableau
Web Development: Django, REST APIs, HTML, CSS, JavaScript
Machine Learning / AI: Pandas, NumPy, Scikit-learn, OpenCV, TensorFlow Lite
Soft Skills: Problem-Solving, Team Collaboration, Leadership, Communication

PROJECTS

Pomegranate Smart Sprayer *Python, OpenCV, TensorFlow Lite, Raspberry Pi, Arduino Uno*

- Developed a Smart Agricultural Robot capable of detecting plant diseases and performing automated spraying.
- Integrated Raspberry Pi 4 and Arduino Uno to control mobility, obstacle detection, and spraying mechanisms.
- Captured real-time crop images using a Raspberry Pi Camera Module for on-device disease identification.
- Processed and classified images using Python, OpenCV, and TensorFlow Lite for accurate disease detection.

Career Guidance System *HTML, CSS, JavaScript, Django*

- Built a full-stack Career Guidance System using Django, HTML, CSS, and JavaScript.
- Designed a user-friendly interface for a career assessment quiz to evaluate user interests and skills.
- Implemented a backend to process user data and recommend personalized career paths.
- Applied strong web development, database management, and UI/UX design practices throughout the project.

Student Performance Prediction System *Python, Django REST Framework, Scikit-learn, Pandas, SQL*

- Developed a Python-based application to predict student academic performance using machine learning and historical student data.
- Performed data preprocessing, feature selection, model training, and evaluation using Pandas and Scikit-learn.
- Built REST APIs using Django REST Framework to process student information and return prediction results.
- Integrated SQL database functionality for storing and retrieving student records and prediction results.

EDUCATION

Global Academy of Technology, Bangalore 2022 – 2026
B.Tech in Artificial Intelligence and Machine Learning (AIML) — CGPA: 7.2

SBR PU College, Kalaburagi 2020 – 2022
Pre-University Education — 83%

SBR Public School, Kalaburagi 2019 – 2020
Secondary School Education — 91.52%

CERTIFICATIONS

- **Artificial Intelligence Intern** – Edutainer
- **Data Science** – IBM
- **Cloud Computing** – Infosys
